

Services to Dental Hygienists

STRAIGHTFORWARD HIGH QUALITY ADVICE

Williams Giles has provided accountancy services to members of the dental profession for over 25 years. The Accounting for Associates is relatively straight-forward, but there are many

mistakes made by those not represented by a dental specialist.

The most common facing Hygienists is their employment status. If this is not treated correctly then there could be additional tax and penalties faced by both your company or the practice itself.

We can help you with your bookkeeping, advise on allowable expenses and assist with queries whether they be accounts, tax or just general advice.

Be it NHS or private dentistry, we believe our experience will help you understand the financial and tax implications being a dental Hygienist

We offer a fixed fee approach which includes your accounts and self-assessment tax return, and includes all calls, emails and letters.

We can provide additional services....

Consultancy

Due to our familiarity with the industry, we can also provide advice on many matter, the most popular being contract reviews.

Tax Planning

With our up-to-date, cutting-edge tax knowledge we ensure that you only ever pay what you must and never more than you need.
